

9. Preflight check

The last things you should check before the first print

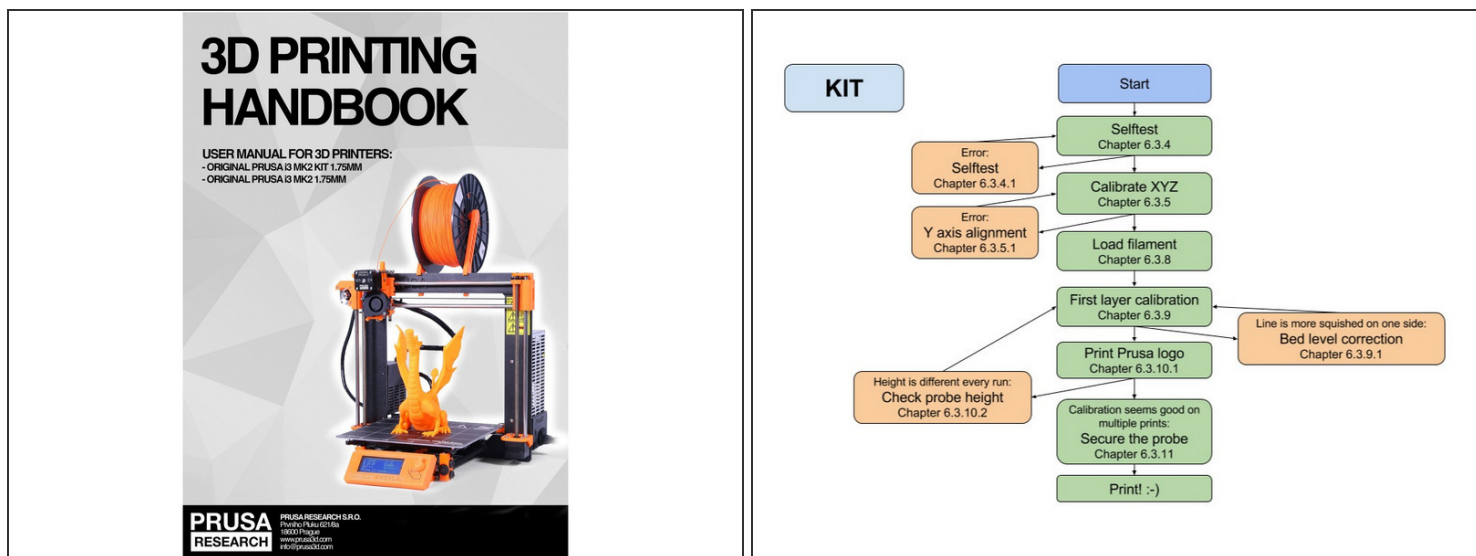

Written By: Josef Prusa

Step 1 — Check your Prusa i3 before printing

- Please watch our video with the most common build problems and their solutions before printing.
<http://www.prusa3d.com/buildvideoMK2>

Step 2 — Quick guide for your first prints

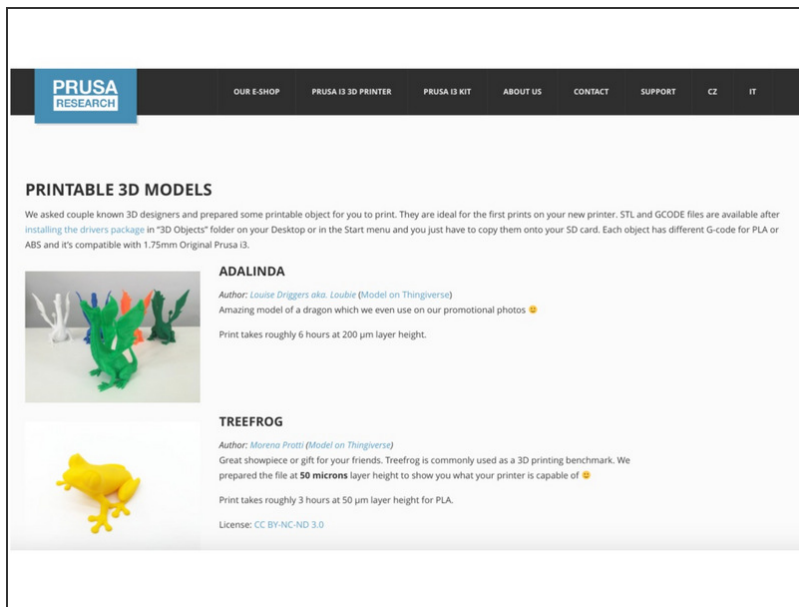

i See our free **3D Printing Handbook** - <http://www.prusa3d.com/3dhandbookMK2>

- Read the chapters *3.2 Disclaimer* and *3.3 Safety instructions*
- Read the chapter *6.3 Setup before printing*.
- Download and install the drivers - chapter *8 Printer drivers*. Don't forget we have ready to print settings for Slic3r, Cura, Simplify3D and KISSlicer.

! Calibrate the printer by following the chapter *6.3.1 Calibration flow*. Please follow the steps exactly, otherwise you can permanently damage the print surface!

Step 3 — Printable 3D models

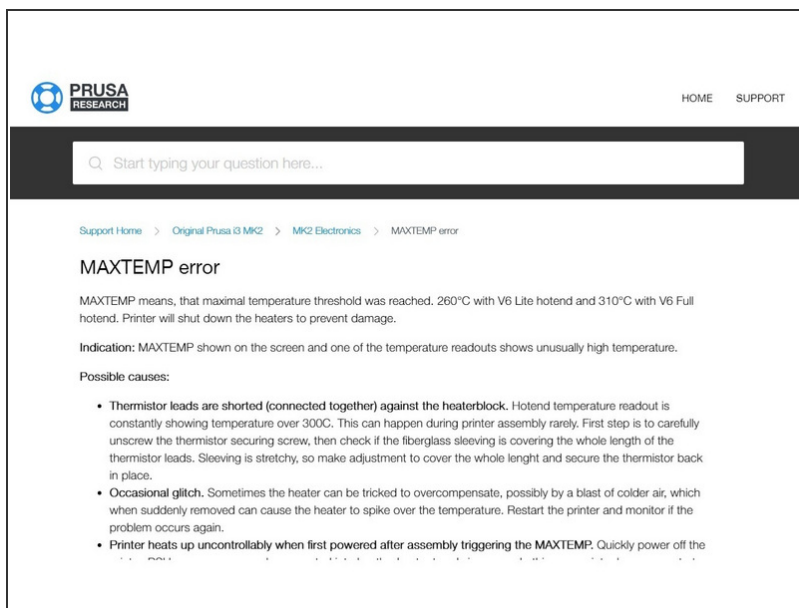

- Read the chapter *7 Printing* of 3D Printing Handbook.

- **Congratulations! You should be ready to print by now ;-)**

- You can start by printing some of our test objects bundled on the included SD card - you can check them out here

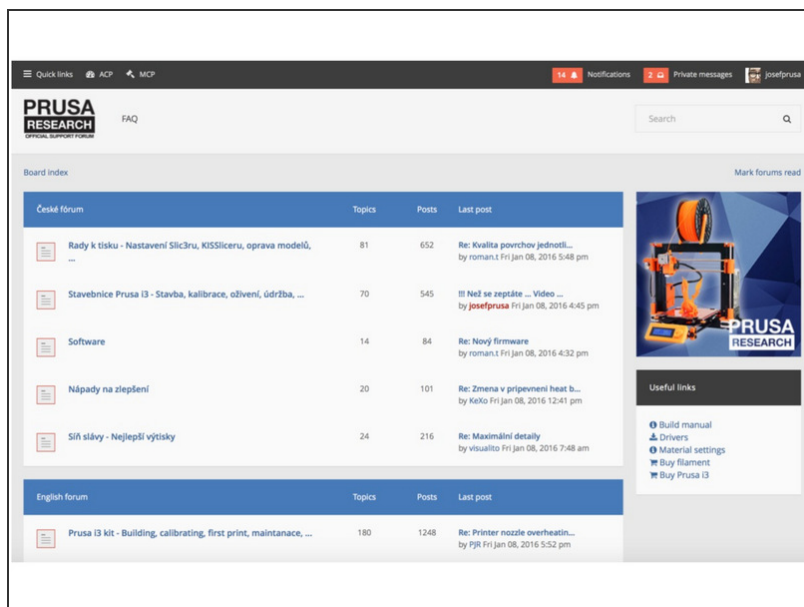

prusa3d.com/printable-3d-models

Step 4 — Prusa knowledge base

- If you encounter any problems at all, don't forget you can always check out our knowledge base at <http://help.prusa3d.com>. We're adding new topics every day!

Step 5 — Prusa3D forum

● If you need help with the build, check out our forum with great community :-)

● Account is shared with <http://shop.prusa3d.com/>

📌 Support forum is available at <http://forum.prusa3d.com>
